## Summary

AI Engineer with 3+ years in Python and FastAPI, shipping real-time LLM pipelines, multi-agent RAG systems, and voice AI agents in production, backed by strong cloud and DevOps experience.

## Technical Skills

**AI & LLM**: Streaming LLMs, model routing, prompt design, LLM evals, RAG, AI agents, LangGraph, LangSmith, ChromaDB, OpenRouter, AWS Bedrock, Claude, Gemini
**Voice AI**: LiveKit, Pipecat, Gemini Live, Twilio, AssemblyAI
**Backend & Desktop**: Python, FastAPI, PHP Laravel, React, Electron, REST APIs
**Cloud & DevOps**: GCP, AWS (EC2, S3, Lambda, Glue), Docker, GitHub Actions, CI/CD, Nginx
**Data & Observability**: PostgreSQL, MongoDB, MySQL, DynamoDB, Redshift, Kafka, Sentry, PostHog, ELK Stack

## Work Experience

**Software Engineer (Contract)** December 2025 - October 2026
*AIApply – Interview Answer Buddy* *UK (Remote)*

- Developed core AI features of Interview Answer Buddy, a cross-platform Electron desktop app on AIApply, a platform used by 2M+ job seekers, giving candidates real-time AI assistance during live interviews
- Engineered a real-time pipeline streaming live speech transcription (AssemblyAI) into streamed LLM answers with model routing and fallback via OpenRouter, served by FastAPI on Docker and GCP, powering 10,000+ interview sessions
- Designed and iterated on answer prompts, testing response quality to improve AI answer accuracy
- Shipped post-interview AI features, UI improvements, and automatic app updates for the desktop client
- Integrated Sentry and PostHog for production monitoring; joined user troubleshooting calls and wrote support docs

**Software Developer** April 2025 - October 2025
*Exhibit BBC Top Gear – Exhibit Social* *Mumbai, MH, IN*

- Built Exhibit Social, an influencer campaign management SaaS managing 1M+ global influencers and 2,000+ brands, using PHP Laravel, Python, PostgreSQL, React+Vite, and GCP
- Created a 2-agent LangGraph reporting workflow (analyst agent for campaign data, writer agent for reports) with RAG on ChromaDB and LangSmith tracing, generating performance summaries and ROI analytics
- Delivered a high-traffic voting system for the InfluencerX Fashion Awards with Nginx load balancing, and a web scraper for BBC Top Gear India

**Jr. DevOps Engineer** April 2024 - April 2025
*Pristine IT Code Pvt Ltd* *Mumbai, MH, IN*

- Automated CI/CD pipelines with GitHub Actions, cutting deployment time by 40%, and set up ELK dashboards that improved log analysis by 30%
- Managed four production apps on AWS EC2 with uptime monitoring, and led a cloud migration that cut operational costs by 20%

**Big Data & Cloud Apprentice** July 2023 - December 2023
*Abzooba (UST)* *Pune, MH, IN*

- Built data pipelines on AWS (Batch, Lambda, Glue, S3, DynamoDB) and an eCommerce pipeline with Kafka and Redshift, improving MySQL integration efficiency by 30%

## Projects

**Voice AI Agent** | *Real-time telephony agent (closed source)*

- Delivered a real-time voice AI agent with LiveKit, Pipecat, Gemini Live, and Twilio, automating 4 inbound call workflows: lead qualification, appointment booking and rescheduling, orders, and support
- Implemented VAD, streaming responses, and barge-in handling for natural conversation, plus tool calling for bookings and order lookups and live call transfer to human agents

**Airblander** | *Open-source Claude Code plugin* airblander.vercel.app

- Launched an open-source plugin that stops AI coding agents from writing against stale SDK docs by blocking edits until current documentation is fetched

## Education & Certifications

**MIT Academy of Engineering** April 2019 - May 2023
*Bachelor of Technology in Information Technology* *CGPA: 8.55*
